

Joe McCabe Biography

As President and CEO of AutoForecast Solutions LLC (AFS), Joe McCabe leverages his decades of industry experience and knowledge to provide production forecasting and advisory services to the global automotive community. Joe manages the automotive turnkey operations at AFS including the global light vehicle, powertrain, drivetrain, and alternative propulsion forecast as well as a suite of AFS proprietary opportunity and sales planning software. AFS supports all tiered suppliers, VMs, government agencies, financial institutions, and the academic community with data, planning solutions, and a personalized support to help identify new business opportunities while mitigating risk. Joe's 25+ year career in automotive forecasting ranges from his tenure at AutoFacts, PwC, AutomotiveCompass, and now AutoForecast Solutions. Joe earned his Bachelor's of Chemical Engineering at Villanova University and an MBA at Pennsylvania State University.

AFS is the premier provider of automotive forecasting databases, business planning solutions, & concierge-level support for the automotive industry. Accurate and timely data is only half the story. Our team of subject matter experts, each with decades of experience, provide a customized and concierge-level of support to each customer. Our business is your business. Your products, your customers, and the issues shaping your success. It's simple, a data provider needs to provide more than just data they need to be your partner. The AFS approach adds value to your critical business decisions. AFS is the right partner to help navigate the volatile automotive industry. We are focused to improve your competitiveness, opportunity identification, and revenue growth. The industry is accelerating at an unprecedented rate and a partner focused on your success is needed to navigate the market properly.
